

Smart CCTV

Smart AI cameras for 24/7, panoramic site coverage. Machine-learning with advanced data analytics platform will enhance your security and management capabilities to help deliver a safer, smarter and more efficient operation.

“The total cost of crime, from theft through to security, amounts to £1.9billion in losses to the retail industry each year.”

British Retail Consortium, 2020

Improved Security

Overhaul internal and perimeter security across your premises for the benefit of building users, staff and customers.

Better Business Management

Gather big data across your real estate portfolio, business centres, logistics parks or educational facilities, to inform better management decisions and resource allocation.

Reduced Costs

Reduce unnecessary overheads with a centralised, remote monitoring platform. Streamline costs using advanced business analytics to target resources where they are most needed, and most effective.

Smart CCTV

Entrance and Exit

Ensure your facilities are secure from external visitors as well as internal theft; across any point of entry and exit with smart cameras and number plate recognition.

Under Vehicle Surveillance

Capture full and high-resolution image of under vehicle to meet higher security requirement.

Improved Accuracy

AI camera brings higher accurate alarm and lower false alarm triggered by small animals, tree movement, shadows, and bright lights to <2%.

Reduce Overheads

Centralise all monitoring into a single platform, reduce overheads, and minimise the potential for human error.

Smart Hardware Design

Camera designed to operate in any environment – regardless of heat, cold, light levels – to eliminate blindspots even in awkward spots.

Asset tagging

Increase efficiency and security by tagging equipment making it easy to find and track throughout the building.

What our customers say about us...

“From initial proposal through implementation, NCG provided clear and concise advice and support to address and mitigate the risk. As the project developed, NCG became our only ICT contractor in which we had full confidence. This proved to be wholly justified as they overcame some formidable obstacles, including under-performance by others, to deliver on time, and on budget”

Gough Chambers

Gordon Walters FCA
Director of Operations

“The Network Control Group have quickly become a reliable trusted supplier of Connectivity, Occupancy, Thermal & Air Quality Solutions to Colliers. Colliers would highly recommend working with such a reliable, professional outfit”

Colliers International

Michael Crawford
Head of Technology
