

Smart Workplace Platform

Maximise control over your office assets with granular occupancy and environmental analytics. Effectively monitor space utilisation, drive ROI across your real estate portfolio and ensure employee wellbeing with a safe, controlled return to work.

“In the office of the future, technology will play a central role in enabling employees to return to office buildings and to work... Organisations will need to manage which employees can come to the office, when they can enter and take their places, how often the office is cleaned, whether the airflow is sufficient, and if they are remaining sufficiently far apart as they move through the space.”

McKinsey (2020)

Understand

Understand granular occupancy levels, space utilisation and environmental factors in real-time. Make data informed management and resource allocation decisions.

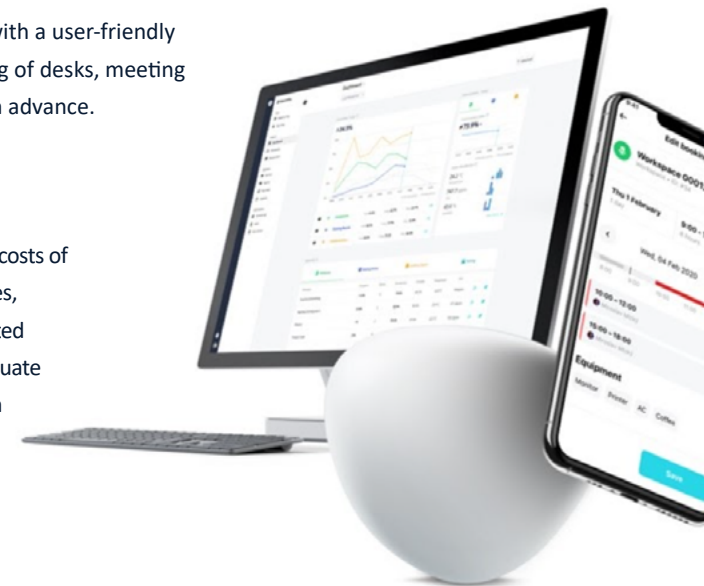

Empower

Empower your employees with a user-friendly mobile app enabling booking of desks, meeting rooms and parking spaces in advance.

Improve

Reduce time and operational costs of maintaining under-used spaces, eliminate frustrations associated with double-bookings, inadequate space size, resource allocation or environmental issues.

Smart Workplace

Deliver a differentiated, smart office that people will want to come to work for!

- ✓ Discrete IoT sensor technology
- ✓ Wireless & easy to deploy
- ✓ Long lasting battery life
- ✓ Passive Infrared technology
- ✓ Fully GDPR compliant

What our customers say about us...

“The Network Control Group have quickly become a reliable trusted supplier of Connectivity, Occupancy, Thermal & Air Quality Solutions to Colliers. Colliers would highly recommend working with such a reliable, professional outfit”

Michael Crawford
Head of Technology
